

## **Axiomatics is looking for a skilled Java programmer!**

Axiomatics (<http://www.axiomatics.com/>) is an exciting product company in the IT security space, specialized on access control based on the XACML standard. As a Java programmer with us you will have a leading role in developing new products and affect the technology choices in the company.

Flexibility, commitment and a willingness to accept varying tasks is important since we are and expansive and customer oriented company with large clients around the globe, with a focus on the US and Europe.

Axiomatics AB has both its headquarters and development center in central Stockholm and has in addition to this also an American sales and marketing company.

### Required skills:

- Experienced developer with deep knowledge in object oriented design, server programming in Java and Web Services
- Experience with Java application servers and frameworks, such as Spring Framework or JEE
- Good knowledge and understanding of relational databases and SQL
- Fluent English, both written and spoken

### Desired skills:

- Experience in rich web UI programming/AJAX in Java (e.g. JSF, Struts, Wicket, ...)
- Experience with ORM technologies, e.g. Hibernate
- UML modelling
- git source code management
- .NET skills

Start: Immediately

Location: Stockholm
